

RAGE/AGER Monoclonal Antibody(Detector)

catalog number: AN002030P

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity	Human
Immunogen	Recombinant Human RAGE/AGER protein expressed by Mammalian
Host	Rat
Isotype	Rat IgG1
Clone	9C7-1
Purification	Protein A/G Purification
Buffer	Phosphate buffered solution, pH 7.2, containing 0.05% Proclin300.

Applications Recommended Dilution

ELISA Detector	0.1-0.4 µg/mL
-----------------------	---------------

Data

Sandwich ELISA-Recombinant Human RAGE/AGER protein standard curve. Background subtracted standard curve using RAGE/AGER antibody(AN002020P) (Capture), RAGE/AGER antibody(AN002030P)(Detector) in sandwich ELISA. The reference range value for Recombinant Human RAGE/AGER protein is 78.13-5000 pg/mL.

Preparation & Storage

Storage	Store at 4°C valid for 12 months or -20°C valid for long term storage, avoid freeze / thaw cycles.
Shipping	The product is shipped with ice pack, upon receipt, store it immediately at the temperature recommended.

Background

The advanced glycosylation end product (AGE) receptor encoded by this gene is a member of the immunoglobulin superfamily of cell surface receptors. It is a multiligand receptor, and besides AGE, interacts with other molecules implicated in homeostasis, development, and inflammation, and certain diseases, such as diabetes and Alzheimer's disease. Many alternatively spliced transcript variants encoding different isoforms, as well as non-protein-coding variants, have been described for this gene.
