GPR172B Polyclonal Antibody

catalog number: **E-AB-13279**

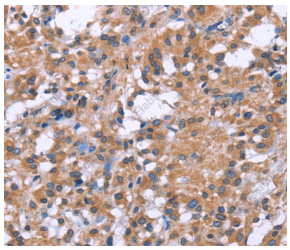

Note: *Centrifuge before opening to ensure complete recovery of vial contents.*

Description

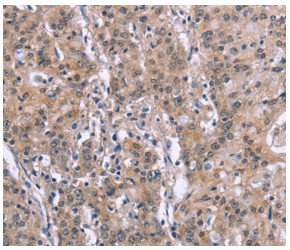

Reactivity	Human
Immunogen	Synthetic peptide of human SLC52A1
Host	Rabbit
Isotype	Rabbit IgG
Purification	Affinity purification
Conjugation	Unconjugated
Buffer	Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.

Applications	Recommended Dilution
IHC	1:50-1:200

Data

Immunohistochemistry of paraffin-embedded Human thyroid cancer tissue using GPR172B Polyclonal Antibody at dilution 1:40

Immunohistochemistry of paraffin-embedded Human gastric cancer tissue using GPR172B Polyclonal Antibody at dilution 1:40

Preparation & Storage

Storage	Store at -20°C Valid for 12 months. Avoid freeze/thaw cycles.
Shipping	The product is shipped with ice pack,upon receipt,store it immediately at the temperature recommended.

Background

Biological redox reactions require electron donors and acceptor. Vitamin B2 is the source for the flavin in flavin adenine dinucleotide (FAD) and flavin mononucleotide (FMN) which are common redox reagents. This gene encodes a member of the riboflavin (vitamin B2) transporter family. Haploinsufficiency of this protein can cause maternal riboflavin deficiency. Multiple alternatively spliced variants, encoding the same protein, have been identified.
