

Glutathione Peroxidase 1/GPX1 Polyclonal Antibody(Capture/Detector)

catalog number: AN000550P

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity	Human
Immunogen	Recombinant Human Glutathione Peroxidase 1/GPX1 protein expressed by E.coli
Host	Goat
Isotype	Goat IgG
Purification	Antigen Affinity Purification
Conjugation	Unconjugated
buffer	Phosphate buffered solution, pH 7.2, containing 0.05% proclin 300.

Applications

ELISA Capture	2-8 µg/mL
ELISA Detector	0.1-0.4 µg/mL

Data

Sandwich ELISA-Recombinant Human Glutathione Peroxidase 1/GPX1 protein standard curve. Background subtracted standard curve using Glutathione Peroxidase 1/GPX1 antibody(AN000550P)(Capture), Glutathione Peroxidase 1/GPX1 antibody(AN000550P)(Detector) in sandwich ELISA. The reference range value for Recombinant Human Glutathione Peroxidase 1/GPX1 protein is 31.25~2000 pg/mL.

Preparation & Storage

Storage	Store at 4°C valid for 12 months or -20°C valid for long term storage, avoid freeze / thaw cycles.
Shipping	The product is shipped with ice pack, upon receipt, store it immediately at the temperature recommended.

Background

This gene encodes a member of the glutathione peroxidase family. Glutathione peroxidase functions in the detoxification of hydrogen peroxide, and is one of the most important antioxidant enzymes in humans. This protein is one of only a few proteins known in higher vertebrates to contain selenocysteine, which occurs at the active site of glutathione peroxidase and is coded by UGA, that normally functions as a translation termination codon. In addition, this protein is characterized in a polyalanine sequence polymorphism in the N-terminal region, which includes three alleles with five, six or seven alanine (ALA) repeats in this sequence. The allele with five ALA repeats is significantly associated with breast cancer risk. Two alternatively spliced transcript variants encoding distinct isoforms have been found for this gene.
