Axl Polyclonal Antibody(Capture/Detector)

catalog number: AN002400P

Note: Centrifuge before opening to ensure complete recovery of vial contents.

г •	
Descri	mtian
Deser	DUL OIL

Reactivity Human

Immunogen Recombinant Human Axl protein expressed by Mammalian

Rabbit **Host** Is otype Rabbit IgG

Purification Antigen Affinity Purification

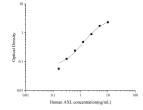

Conjugation Unconjugated

Buffer Phosphate buffered solution, pH 7.2, containing 0.05% proclin 300.

Recommended Dilution Applications

 $2-8 \mu g/mL$ **ELISA Capture** $0.1\text{-}0.4~\mu g/mL$ **ELISA Detector** WB 1:500-1:1000

Data

Sandwich ELISA-Recombinant Human Axl protein standard Western blot with Anti Axl Polyclonal antibody at dilution curve.Background subtracted standard curve using Axl antibody(AN002400P)(Capture), Axl antibody(AN002400P) (Detector) in sandwich ELISA. The reference range value for Recombinant Human Axl protein is 0.15625-10 ng/mL.

of 1:1000. Lane 1: HeLa. Observed-MV:138 kDa Calculated-MV:98 kDa

Preparation & Storage

Storage Store at 4°C valid for 12 months or -20°C valid for long term storage, avoid freeze /

The protein encoded by this gene is a member of the Tyro3-Axl-Mer (TAM) receptor tyrosine kinase subfamily. The encoded protein possesses an extracellular domain which is composed of two immunoglobulin-like motifs at the N-terminal, followed by two fibronectin type-III motifs. It transduces signals from the extracellular matrix into the cytoplasm by binding to the vitamin K-dependent protein growth arrest-specific 6 (Gas6). This gene may be involved in several cellular functions including growth, migration, aggregation and anti-inflammation in multiple cell types. Alternative splicing results in multiple transcript variants of this gene.AXL (AXL Receptor Tyrosine Kinase) is a Protein Coding gene. Diseases associated with AXL include Lymphocytic Choriomeningitis and Femoral Neuropathy. Among its related pathways are GPCR Pathway and RET signaling. GO annotations related to this gene include transferase activity, transferring phosphorus-containing groups and protein tyrosine kinase activity. An important paralog of this gene is MERTK.
