

A Reliable Research Partner in Life Science and Medicine

# Recombinant Mouse GDNF protein(N-His)

Catalog Number: PKSM041512

Note: Centrifuge before opening to ensure complete recovery of vial contents.

# Description

Species Mouse

**Source** E.coli-derived Mouse GDNF protein Ser 78-Ile 211, with an C-terminal His

 Mol\_Mass
 15.9 kDa

 Accession
 P48540

**Bio-activity** Not validated for activity

## **Properties**

**Purity** > 98 % as determined by reducing SDS-PAGE.

**Endotoxin**  $< 0.1 \text{ EU per } \mu\text{g of the protein as determined by the LAL method.}$ 

**Storage** Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80

°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of

reconstituted samples are stable at < -20°C for 3 months.

**Shipping** This product is provided as lyophilized powder which is shipped with ice packs.

**Formulation** Lyophilized from sterile PBS, pH 7.4.

Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as protectants

before lyophilization.

Please refer to the specific buffer information in the printed manual.

**Reconstitution** Please refer to the printed manual for detailed information.

#### Data

> 98 % as determined by reducing SDS-PAGE.

## Background

Glial Cell Line-Derived Neurotrophic Factor (GDNF) is a disulfide-linked homodimeric glycoprotein that belongs to the TGF- $\beta$  superfamily. It has been shown to promote the survival of various neuronal subpopulations in both the central as well as the peripheral nervous systems at different stages of their development. Human GDNF cDNA encodes a 211 amino acid residue prepropeptide that is processed to yield a dimeric protein. Mature human GDNF was predicted to contain two 134 amino acid residue subunits. Cells known to express GDNF include Sertoli cells, type 1 astrocytes, Schwann cells, neurons, pinealocytes and skeletal muscle cells. Mutations in this gene may be associated with Hirschsprung disease.
