Elabscience®

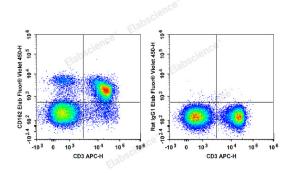

Elab Fluor[®] Violet 450 Anti-Mouse CD162 Antibody[4RA10]

Catalog Number: E-AB-F1034Q

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description	
Reactivity	Mouse
Host	Rat
lsotype	Rat lgG1, κ
Clone No.	4RA10
Isotype Control	Elab Fluor [®] Violet 450 Rat IgG1, κ Isotype Control[HRPN] [Product E-AB-F09822Q]
Conjugation	Elab Fluor [®] Violet 450
Conjugation Information	Elab Fluor [®] Violet 450 is designed to be excited by the violet laser (405 nm) and detected using an optical filter centered near 450 nm (e.g., a $450/45$ nm bandpass filter).
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.
Applications	Recommended usage
FCM	Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 µL of antibody per test (million cells in 100 µL staining volume or per 100 µL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Data

C57BL/6 murine splenocytes are stained with APC Anti-

Mouse CD3 Antibody and Elab Fluor[®] Violet 450 Anti-Mouse CD162 Antibody (Left). Splenocytes are stained with APC

Anti-Mouse CD3 Antibody and Elab Fluor[®] Violet 450 Rat IgG1 Isotype Control (Right).

Preparation & Storag	e
Storage	Keep as concentrated solution. This product can be stored at 2-8°C for 12 months. Please protected from prolonged exposure to light and do not freeze.
Shipping	Ice bag
Antigen Information	
Alternate Names Uniprot ID	CD162;P-selectin glycoprotein ligand 1;PSGL-1;Selectin P ligand;Selplg;PSGL1 Q62170

Gene ID Background

20345

The 4RA10 antibody reacts with the N-terminal functional peptide of CD162 (P-selectin glycoprotein ligand-1, PSGL-1), encoded by the SelpI gene. PSGL-1 is expressed on the cell surface as a homodimer of approximately 230 kDa. In the mouse, SelpI mRNA is detected in most tissues, with high levels found in hematopoietic cells, brain, and adipose tissue. Flow cytometric analyses have revealed CD162 expression on bone marrow-derived mast and dendritic cells, splenic leukocytes, platelets, peripheral blood neutrophils, and neutrophil and T-cell lines. PSGL-1 is a ligand for P-selectin (CD62P) and is involved in leukocyte rolling, the migration of leukocytes into inflamed tissues, and responses to vascular injury. It is a sialomucin that must be specifically sialylated, fucosylated, and sulfated to bind P-selectin. There is also evidence that other ligands for PSGL-1 and CD62P may exist. 4RA10 mAb is reported to block the binding of mouse leukocytes to CD62P and CD62L.
