

Elab Bright™ Violet 510 Anti-Mouse CD8a Antibody[53-6.7]

Catalog Number: E-AB-F1104R1

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

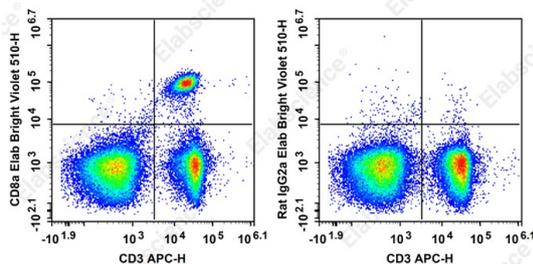

Reactivity	Mouse
Host	Rat
Isotype	Rat IgG2a, κ
Clone No.	53-6.7
Isotype Control	Elab Bright™ Violet 510 Rat IgG2a, κ Isotype Control[R35-95] [Product AN00822R1]
Conjugation	Elab Bright™ Violet 510
Conjugation Information	Elab Bright™ Violet 510 is designed to be excited by the violet laser (405 nm) and detected using an optical filter centered near 510 nm (e.g., a 525/50 nm bandpass filter).
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer.

Applications

Recommended usage

FCM	Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μL of antibody per test (million cells in 100 μL staining volume or per 100 μL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.
-----	---

Data

Staining of Balb/C murine splenocytes cells with BV510 Anti-Mouse CD8a Antibody and APC Anti-Mouse CD3 Antibody[P84] (left) or BV510 Rat IgG2a, κ Isotype Control (right). Total viable cells were used for analysis.

Preparation & Storage

Storage	Keep as concentrated solution. This product can be stored at 2-8°C for 24 months. Please protected from prolonged exposure to light and do not freeze.
Shipping	Ice bag

Antigen Information

Alternate Names	T8;Lyt2;Ly-2
Uniprot ID	P01731
Gene ID	12525

For Research Use Only

Background

CD8, also known as Lyt-2, Ly-2, or T8, consists of disulfide-linked α and β chains that form the α (CD8a)/ β (CD8b) heterodimer and α/α homodimer. CD8a is a 34 kD protein that belongs to the immunoglobulin family. The CD8 α/β heterodimer is expressed on the surface of most thymocytes and a subset of mature TCR α/β T cells. CD8 expression on mature T cells is non-overlapping with CD4. The CD8 α/α homodimer is expressed on a subset of γ/δ TCR-bearing T cells, NK cells, intestinal intraepithelial lymphocytes, and lymphoid dendritic cells. CD8 is an antigen co-receptor on T cells that interacts with MHC class I on antigen-presenting cells or epithelial cells. CD8 promotes T cell activation through its association with the TCR complex and protein tyrosine kinase lck.
