

A Reliable Research Partner in Life Science and Medicine

CD19 Monoclonal Antibody

catalog number: AN200122P

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity Human

Immunogen Recombinant Human CD19 Protein

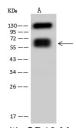

Host Mouse
Isotype IgG1
Clone A970
Purification Protein A

Buffer 0.2 µm filtered solution in PBS

Applications Recommended Dilution

WB 1:500-1:2000

Data

Western Blot with CD19 Monoclonal Antibody at dilution of 1:500. Lane A: Daudi Whole Cell Lysate, Lysates/proteins at 30 µg per lane.

Observed-MW:61 kDa Calculated-MW:61 kDa

Preparation & Storage

Storage This antibody can be stored at 2°C-8°C for one month without detectable loss of

activity. Antibody products are stable for twelve months from date of receipt when

stored at -20 $^{\circ}\text{C}$ to -80 $^{\circ}\text{C}$. Preservative-Free. Avoid repeated freeze-thaw cycles .

Shipping Ice bag

Background

CD19 protein is a 95 kDa transmembrane glycoprotein that plays a central role in B cell activation and humoral immune responses . CD19 is expressed throughout B cell development from pre-B cells through mature B cells, and it is commonly used as a B cell lineage marker . It is required for the responsiveness of mature B cell to antigen stimulation, germinal center development, and antibody affinity maturation . The CD19 protein associates with the B cell antigen receptor (BCR), CD81, CD38, CD21, CD22, and IFITM1/CD225/Leu13. These associations enable CD19 to amplify B cell signaling and reduce the threshold for antigen stimulation through the BCR.
