

SARS-COV-2 NP Monoclonal Antibody(2019-nCoV)

catalog number: E-AB-V1018

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity	SARS-COV2
Immunogen	Recombinant 2019-nCoV Nucleocapsid Protein (His Tag)
Host	Mouse
Isotype	IgG1
Clone	4A6
Buffer	0.2 μm filtered solution in PBS.

Applications Recommended Dilution

ELISA	1:5000-1:10000
--------------	----------------

Data

Immobilized 2019-nCoV Nucleocapsid Protein

(Cat#PKSR030485) at 5.0 μg/mL (100 μL/well) can bind

2019-nCoV NP Antibody (4A9)(Cat#E-AB-V1018), the

EC50 for this effect is 29.8 ng/mL.

Capture Antibody	Detection Antibody	ED50
E-AB-V1018[569]	E-AB-V1018[4A6]	53.8ng/mL
E-AB-V1018[4A6]	E-AB-V1018[569]	57.0ng/mL

Preparation & Storage

Storage	Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.
Shipping	The product is shipped with ice pack, upon receipt, store it immediately at the temperature recommended.

Background

Coronavirus N protein is required for coronavirus RNA synthesis, and has RNA chaperone activity that may be involved in template switch. Nucleocapsid protein is a most abundant protein of coronavirus. N protein packages the positive strand viral genome RNA into a helical ribonucleocapsid (RNP) and plays a fundamental role during virion assembly through its interactions with the viral genome and membrane protein M. Plays an important role in enhancing the efficiency of subgenomic viral RNA transcription as well as viral replication. Because of the conservation of N protein sequence and its strong immunogenicity, the N protein of coronavirus is chosen as a diagnostic tool.
