Recombinant Human CCL23/MPIF-1 Protein(Sumo Tag)

Catalog Number: PDEH100607

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description	
Species	Human
Source	E.coli-derived Human CCL23/MPIF-1 protein Arg22-Asn120, with an N-terminal Sumo
Calculated MW	23.8 kDa
Observed MW	30 kDa
Accession	P55773
Bio-activity	Not validated for activity
Properties	
Purity	> 90% as determined by reducing SDS-PAGE.
Endotoxin	< 10 EU/mg of the protein as determined by the LAL method
Storage	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80
	°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at $<$ -20°C for 3 months.
Shipping	This product is provided as lyophilized powder which is shipped with ice packs.
Formulation	Lyophilized from a 0.2 μm filtered solution in PBS with 5% Trehalose and 5%
	Mannitol.
Reconstitution	It is recommended that sterile water be added to the vial to prepare a stock solution of
	0.5 mg/mL. Concentration is measured by UV-Vis.

Data

SDS-PAGE analysis of Human CCL23/MPIF-1 proteins, 2 µg/lane of Recombinant Human CCL23/MPIF-1 proteins was resolved with SDS-PAGE under reducing conditions, showing bands at 30 KD

Background

CCL23/MPIF-1, also known as MIP 3, is a small cytokine which belongs to the CC chemokine family. Cytokines are a family of secreted proteins involved in immunoregulatory and inflammatory processes. CCL23/MPIF-1 is predominantly expressed in lung and liver tissue, but also can be detected in bone marrow and placenta. It displays chemotactic activity on resting T lymphocytes and monocytes, lower activity on neutrophils and no activity on activated T lymphocytes. CCL23/MPIF-1 is also a strong suppressor of colony formation by a multipotential hematopoietic progenitor cell line.
