

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## Description

|                     |                                                        |
|---------------------|--------------------------------------------------------|
| <b>Reactivity</b>   | Human,Mouse,Rat                                        |
| <b>Immunogen</b>    | Recombinant fusion protein of human SRR (NP_068766.1). |
| <b>Host</b>         | Rabbit                                                 |
| <b>Isotype</b>      | IgG                                                    |
| <b>Purification</b> | Affinity purification                                  |
| <b>Conjugation</b>  | Unconjugated                                           |
| <b>Formulation</b>  | PBS with 0.02% sodium azide, 50% glycerol, pH7.3.      |

## Applications Recommended Dilution

|           |              |
|-----------|--------------|
| <b>WB</b> | 1:500-1:2000 |
|-----------|--------------|

## Data

Western blot analysis of extracts of Rat brain using  
SRR Polyclonal Antibody at dilution of 1:1000.

**Observed MW:37kDa**

**Calculated Mw:36kDa**

## Preparation & Storage

|                |                                             |
|----------------|---------------------------------------------|
| <b>Storage</b> | Store at -20°C. Avoid freeze / thaw cycles. |
|----------------|---------------------------------------------|

## Background

SRR (Serine Racemase) is a Protein Coding gene. Diseases associated with SRR include Robinow Syndrome, Autosomal Recessive 1 and Vitamin E, Familial Isolated Deficiency Of. Among its related pathways are Neuroscience and Metabolism. Gene Ontology (GO) annotations related to this gene include calcium ion binding and magnesium ion binding. An important paralog of this gene is CBS.
