Elabscience®

Cathepsin L Polyclonal Antibody

catalog number: E-AB-10211

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description			
Reactivity	Human		
Immunogen	Recombinant protein of human CTSL		
Host	Rabbit		
Isotype	IgG		
Purification	Affinity purification		
Buffer	Phosphate buffered solv	Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.	
Applications	Recommended Dilution		
IHC	1:50-1:200		
Data			
esophagus cancer tiss	ry of paraffin-embedded Human sue using Cathepsin L Polyclonal	Immunohistochemistry of paraffin-embedded Human thyroid cancer tissue using Cathepsin L Polyclonal Antibody at	
esophagus cancer tiss Antibo			
esophagus cancer tiss	sue using Cathepsin L Polyclonal	cancer tissue using Cathepsin L Polyclonal Antibody at	
esophagus cancer tiss Antibo	sue using Cathepsin L Polyclonal ody at dilution 1:50	cancer tissue using Cathepsin L Polyclonal Antibody at	
esophagus cancer tiss Antibo Preparation & Storage	sue using Cathepsin L Polyclonal ody at dilution 1:50 Store at -20°C Valid for	cancer tissue using Cathepsin L Polyclonal Antibody at dilution 1:50	

Background

The protein encoded by this gene is a lysosomal cysteine proteinase that plays a major role in intracellular protein catabolism. Its substrates include collagen and elastin, as well as alpha-1 protease inhibitor, a major controlling element of neutrophil elastase activity. The encoded protein has been implicated in several pathologic processes, including myofibril necrosis in myopathies and in myocardial ischemia, and in the renal tubular response to proteinuria. This protein, which is a member of the peptidase C1 family, is a dimer composed of disulfide-linked heavy and light chains, both produced from a single protein precursor. Multiple alternatively spliced transcript variants have been found for this gene.
