

Recombinant Human Corneodesmosin/CDSN Protein (His Tag)

Catalog Number:PKSH032280

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

| | |
|------------------------------------|-------------------------------|
| Synonyms | Corneodesmosin;S Protein;CDSN |
| Species | Human |
| Expression Host | HEK293 Cells |
| Sequence | Lys33-Pro528 |
| Accession | AAH31993.1 |
| Calculated Molecular Weight | 49.3 kDa |
| Observed molecular weight | 58-70 kDa |
| Tag | C-His |

Properties

| | |
|-----------------------|---|
| Purity | > 95 % as determined by reducing SDS-PAGE. |
| Endotoxin | < 1.0 EU per μ g of the protein as determined by the LAL method. |
| Storage | Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months. |
| Shipping | This product is provided as lyophilized powder which is shipped with ice packs. |
| Formulation | Lyophilized from a 0.2 μ m filtered solution of 20mM PB, 150mM NaCl, pH 7.4. Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization. |
| | Please refer to the specific buffer information in the printed man |
| Reconstitution | Please refer to the printed manual for detailed information. |

Data

> 95 % as determined by reducing SDS-PAGE.

Background

Corneodesmosin is a protein that is encoded by the CDSN gene in humans. This gene encodes a protein found in corneodesmosomes, which localize to human epidermis and other cornified squamous epithelia. During maturation of the cornified layers, the protein undergoes a series of cleavages, which are thought to be required for desquamation.
