

LDHA Polyclonal Antibody

catalog number: E-AB-70210

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

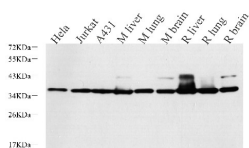

Reactivity	Human;Mouse;Rat
Immunogen	KLH conjugated Synthetic peptide corresponding to Mouse LDHA
Host	Rabbit
Isotype	IgG
Purification	Affinity purification
Conjugation	Unconjugated
Buffer	Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer, 1% protein protectant and 50% glycerol.

Applications

Recommended Dilution

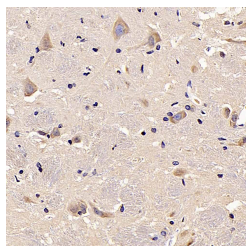

WB	1:1000-1:2000
IHC	1:400-1:1000

Data

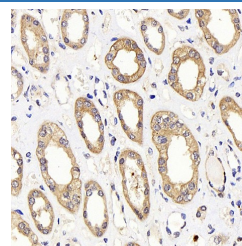

Western Blot analysis of various samples using LDHA Polyclonal Antibody at dilution of 1:1000.

Observed-MV:37 kDa
Calculated-MV:37 kDa

Immunohistochemistry analysis of paraffin-embedded rat brain using LDHA Polyclonal Antibody at dilution of 1:300.

Immunohistochemistry analysis of paraffin-embedded human kidney using LDHA Polyclonal Antibody at dilution of 1:1000.

Preparation & Storage

Storage	Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.
Shipping	The product is shipped with ice pack, upon receipt, store it immediately at the temperature recommended.

Background

For Research Use Only

LDHA, also named as LDH-M and NY-REN-59, is an enzyme which catalyzes the inter-conversion of pyruvate and L-lactate with concomitant inter-conversion of NADH and NAD⁺. LDHA is found in most somatic tissues, though predominantly in muscle tissue and tumours, and belongs to the lactate dehydrogenase family. It has long been known that many human cancers have higher LDHA levels compared to normal tissues. It has also been shown that LDHA plays an important role in the development, invasion and metastasis of malignancies. Mutations in LDHA have been linked to exertional myoglobinuria. LDHA has some isoforms with MW 26-40 kDa.
