

## ENPP5 Polyclonal Antibody

catalog number: E-AB-14060

**Note:** *Centrifuge before opening to ensure complete recovery of vial contents.*

### Description

|                     |                                                                                    |
|---------------------|------------------------------------------------------------------------------------|
| <b>Reactivity</b>   | Human;Mouse;Rat                                                                    |
| <b>Immunogen</b>    | Recombinant protein of human ENPP5                                                 |
| <b>Host</b>         | Rabbit                                                                             |
| <b>Isotype</b>      | Rabbit IgG                                                                         |
| <b>Purification</b> | Affinity purification                                                              |
| <b>Buffer</b>       | Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol. |

### Applications

### Recommended Dilution

|     |             |
|-----|-------------|
| IHC | 1:100-1:300 |
|-----|-------------|

### Data

Immunohistochemistry of paraffin-embedded Human breast cancer tissue using ENPP5 Polyclonal Antibody at dilution 1:60

Immunohistochemistry of paraffin-embedded Human ovarian cancer tissue using ENPP5 Polyclonal Antibody at dilution 1:60

### Preparation & Storage

|                 |                                                                                                          |
|-----------------|----------------------------------------------------------------------------------------------------------|
| <b>Storage</b>  | Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.                                          |
| <b>Shipping</b> | The product is shipped with ice pack, upon receipt, store it immediately at the temperature recommended. |

### Background

ENPP5 is a single-pass membrane protein that belongs to the nucleotide pyrophosphatase/phosphodiesterase family. It may play a role in neuronal cell communication, and it lacks nucleotide pyrophosphatase and lysopholipase D activity.
