Mouse ACV-A Antibody Pair Set

Catalog No. E-KAB-0648 Applications ELISA

Synonyms ACV-A; Activin Beta A Beta A Homodimer

Kit components & Storage

Title	Specifications	Storage
Mouse ACV-A Capture Antibody	1 vial, 100 μ g	Store at -20°C for one year.
		Avoid freeze/thaw cycles.
Mouse ACV-A Detection Antibody	1 vial, 50 μL	Store at -20°C for one year.
(Biotin)		Avoid freeze/thaw cycles.

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Product Information

Items		Characteristic (E-KAB-0648)		
		Mouse ACV-A Capture Antibody	Mouse ACV-A Detection Antibody	
			(Biotin)	
Immunogen	Immunogen	Recombinant Mouse ACV-A protien	Recombinant Mouse ACV-A protien	
Information	Swissprot	/		
Product details	Reactivity	Mouse	Mouse	
	Host	Mouse	Mouse	
	Conjugation	Unconjugated	Biotin	
	Concentration	0.5 mg/mL	/	
	Buffer	PBS with 0.04% Proclin 300; 50%	PBS with 0.04% Proclin 300; 1%	
		glycerol; pH 7.5	protective protein; 50% glycerol; pH	
			7.5	
	Purify	Protein A or G	Protein A or G	
	Specificity	Detects Mouse ACV-A in ELISAs.		

For Research Use Only

Applications

Mouse ACV-A Sandwich ELISA Assay:

	Recommended	Reagent	Images
	Concentration/Dilution		
ELISA	0.5-4 μg/mL	Mouse ACV-A Capture	
Capture		Antibody	10]
ELISA Detection	1:1000-1:10000	Mouse ACV-A Detection Antibody (Biotin)	Optical Density
			0.1 1000 10000 10000 Mouse ACV-A Concentration(pg/mL)

Note: This standard curve is only for demonstration purposes. A standard curve should be generated for each assay!

Background

The inhibin beta A subunit joins the alpha subunit to form a pituitary FSH secretion inhibitor. Inhibin has been shown to regulate gonadal stromal cell proliferation negatively and to have tumor-suppressor activity. In addition, serum levels of inhibin have been shown to reflect the size of granulosa-cell tumors and can therefore be used as a marker for primary as well as recurrent disease. Because expression in gonadal and various extragonadal tissues may vary severalfold in a tissue-specific fashion, it is proposed that inhibin may be both a growth/differentiation factor and a hormone. Furthermore, the beta A subunit forms a homodimer, activin A, and also joins with a beta B subunit to form a heterodimer, activin AB, both of which stimulate FSH secretion. Finally, it has been shown that the beta A subunit mRNA is identical to the erythroid differentiation factor subunit mRNA and that only one gene for this mRNA exists in the human genome.
