

RPA2 Polyclonal Antibody

Catalog Number:E-AB-17006

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity	Human
Immunogen	Full length fusion protein
Host	Rabbit
Isotype	IgG
Purification	Affinity purification
Conjugation	Unconjugated
Formulation	PBS with 0.05% sodium azide and 50% glycerol, PH7.4

Applications Recommended Dilution

WB	1:500-2000
IHC	1:30-150
ELISA	1:2000-5000

Data

Immunohistochemistry of paraffin-embedded Human breast cancer using RPA2 Polyclonal Antibody at dilution of 1/45
Calculated Mw:29 kDa

Western Blot analysis of Hela, huvec, HepG2, A549, Jurkat, 231 and A431 cells using RPA2 Polyclonal Antibody at dilution of 1/650

Preparation & Storage

Storage Store at -20°C. Avoid freeze / thaw cycles.

Background

Replication protein A 32 kDa subunit is a protein that in humans is encoded by the RPA2 gene. As part of the heterotrimeric replication protein A complex (RPA/RP-A), binds and stabilizes single-stranded DNA intermediates, that form during DNA replication or upon DNA stress. It prevents their reannealing and in parallel, recruits and activates different proteins and complexes involved in DNA metabolism. Thereby, it plays an essential role both in DNA replication and the cellular response to DNA damage.
