Elabscience®

PE/Cyanine5.5 Anti-Mouse CD40 Antibody[FGK4.5/FGK45]

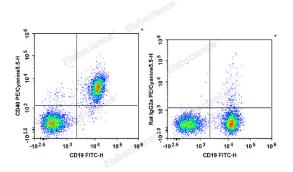

Catalog Number: E-AB-F1028UI

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description	
Reactivity	Mouse
Host	Rat
Isotype	Rat lgG2a, κ
Clone No.	FGK4.5/FGK45
Isotype Control	PE/Cyanine5.5 Rat IgG2a, κ Isotype Control[2A3] [Product E-AB-F09833I]
Conjugation	PE/Cyanine 5.5
Conjugation Information	PE/Cyanine5.5 is designed to be excited by the Blue (488 nm), Green (532 nm) and yellow-green (561 nm) lasers and detected using an optical filter centered near 690 nm (e.g., a 690/50 nm bandpass filter).
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.
Applications	Recommended usage
FCM	Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the

reagent to obtain optimal results [The recommended concentration is 0.1-1 $\mu g/10^6$ cells in 100 μL volume].

Data

C57BL/6 murine splenocytes are stained with FITC Anti-Mouse CD19 Antibody and PE/Cyanine5.5 Anti-Mouse CD40 Antibody (Left). Splenocytes are stained with FITC Anti-Mouse CD19 Antibody and PE/Cyanine5.5 Rat IgG2a, κ Isotype Control (Right).

Preparation & Storage		
Storage	Keep as concentrated solution.	
	This product can be stored at 2-8°C for 12 months. Ple	ease protected from prolonged
	exposure to light and do not freeze.	
Shipping	lce bag	
Antigen Information		
Alternate Names	B-cell surface antigen CD40;Bp50;CD40;CD40L receptor;Cd40;Tnfrsf5;Tumor necrosis	
	factor receptor superfamily member 5	
For Research Use O	nly

CD40 is a 48 kD type I transmembrane glycoprotein also known as Bp50. It is a member of the tumor necrosis factor receptor (TNFR) superfamily and is expressed on B cells, basal epithelial cells, macrophages, follicular dendritic cells, endothelial cells, and a subset of CD34+ hematopoietic progenitors. CD40 regulates B cell developmen t/maturation, Ig isotype switching and, in combination with other signals such as IL-4, protects B cells from surface Ig-induced apoptosis and promotes proliferation. Interaction of CD40 with its ligand CD154 (gp39), which is expressed on activated T cells, is important in costimulation and immune regulation.
