

Histone H2A.X Polyclonal Antibody

catalog number: E-AB-70233

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity	Human;Mouse;Rat
Immunogen	KLH conjugated Synthetic peptide corresponding to Mouse Histone H2A.X
Host	Rabbit
Isotype	IgG
Purification	Affinity purification
Conjugation	Unconjugated
buffer	Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer, 1% protein protectant and 50% glycerol.

Applications

Applications	Recommended Dilution
WB	1:500-1:2000
IHC	1:300-1:800

Data

Western Blot analysis of various samples using Histone H2A.X Polyclonal Antibody at dilution of 1:1000.

Observed-MV: 18 kDa

Calculated-MV: 15-18 kDa

Immunohistochemistry analysis of paraffin-embedded rat testis using Histone H2A.X Polyclonal Antibody at dilution of 1:400.

Immunohistochemistry analysis of paraffin-embedded mouse testis using Histone H2A.X Polyclonal Antibody at dilution of 1:400.

Preparation & Storage

Storage	Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.
Shipping	The product is shipped with ice pack, upon receipt, store it immediately at the temperature recommended.

Background

For Research Use Only

Histone H2A.X Polyclonal Antibody

catalog number: E-AB-70233

Histones are basic nuclear proteins that are responsible for the nucleosome structure of the chromosomal fiber in eukaryotes. Two molecules of each of the four core histones (H2A, H2B, H3, and H4) form an octamer, around which approximately 146 bp of DNA is wrapped in repeating units, called nucleosomes. The linker histone, H1, interacts with linker DNA between nucleosomes and functions in the compaction of chromatin into higher order structures. This gene encodes a replication-independent histone that is a member of the histone H2A family, and generates two transcripts through the use of the conserved stem-loop termination motif, and the polyA addition motif.
