Elabscience®

YKL-40 / CHI3L1 Polyclonal Antibody

catalog number: E-AB-67558

Note: Centrifuge before opening to ensure complete recovery of vial contents.

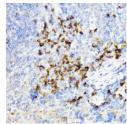

Description	
Reactivity	Human;Mouse;Rat
Immunogen	Recombinant fusion protein of human YKL-40 / CHI3L1 (NP_001267.2).
Host	Rabbit
Isotype	IgG
Purification	Affinity purification
Buffer	Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.
Applications	Recommended Dilution
IHC	1:50-1:200

1:50-1:200

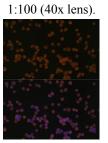

Data

IF

Immunohistochemistry of paraffin-embedded Mouse liver

Immunohistochemistry of paraffin-embedded Mouse spleen using YKL-40 / CHI3L1 Polyclonal Antibody at dilution of using YKL-40 / CHI3L1 Polyclonal Antibody at dilution of 1:100 (40x lens).

Immunofluorescence analysis of Raw264.7 cells using YKL-40 / CHI3L1 Polyclonal Antibody at dilution of 1:100. Blue: DAPI for nuclear staining

Dra i for nuclear summig.	
Preparation & Storage	
Storage	Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.
Shipping	The product is shipped with ice pack, upon receipt, store it immediately at the temperature recommended.

Elabscience®

Chitinases catalyze the hydrolysis of chitin, which is an abundant glycopolymer found in insect exoskeletons and fungal cell walls. The glycoside hydrolase 18 family of chitinases includes eight human family members. This gene encodes a glycoprotein member of the glycosyl hydrolase 18 family. The protein lacks chitinase activity and is secreted by activated macrophages, chondrocytes, neutrophils and synovial cells. The protein is thought to play a role in the process of inflammation and tissue remodeling.
