

Streptavidin Monoclonal Antibody

catalog number: E-AB-48032

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity	All
Immunogen	Native Streptomyces Avidinii streptavidin protein
Host	Mouse
Isotype	IgG1
Clone	1C4
Purification	Protein A/G Purification
Conjugation	Unconjugated
buffer	PBS with 0.05% proclin 300, 1% protective protein and 50% glycerol,pH7.4

Applications

Recommended Dilution

WB	1:5000-10000
-----------	--------------

Data

Western blotting of 10ng Streptavidin (16kDa) with anti-Streptavidin mouse monoclonal antibody at dilution of lane 1:

1:5000, lane 2: 1:10000.

Observed-MV:16 kDa

Calculated-MV:16 kDa

Preparation & Storage

Storage	Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.
Shipping	The product is shipped with ice pack,upon receipt,store it immediately at the temperature recommended.

Background

Streptavidin is a biotin-binding protein found in the culture broth of the bacterium Streptomyces. Streptavidin can bind to four moles of biotin per mole of protein with extremely high affinity, approximately 10,000-15,000 Da. Streptavidin lacks the carbohydrate side chains present on avidin and has an isoelectric point of 6.5 to avidin's 10 far closer to that at which most useful biological interactions occur. As a result, Streptavidin frequently exhibits much lower non-specific binding than avidin does.
