

A Reliable Research Partner in Life Science and Medicine

# **BMP2 Monoclonal Antibody**

catalog number: E-AB-70352

Note: Centrifuge before opening to ensure complete recovery of vial contents.

#### Description

**Reactivity** Rat

Immunogen Recombinant protein corresponding to Mouse BMP2

HostMouseIs otypeIgGClone2H6D12

**Purification** Affinity purification

**Buffer** Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer, 1% protein

protectant and 50% glycerol.

**Applications** Recommended Dilution

**IHC** 1:200-1:800

### Data

Immunohistochemistry analysis of paraffin-embedded rat bone using BMP2 Monoclonal Antibody at dilution of 1:400.

## Preparation & Storage

Storage Storage Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.

**Shipping** The product is shipped with ice pack, upon receipt, store it immediately at the

temperature recommended.

### Background

Bone morphogenetic protein-2 (BMP-2) is a member of the transforming growth factor-beta (TGFB) superfamily. BMP2 is synthesized as a 60 kDa precursor that is processed in the secretory pathway to a small 18 kDa monomer; 2 monomers then associate to form the active 30 kDa homodimer, which binds to its receptor. There is also a 40-45 kDa form of BMP2, as an amino-terminal propeptide. BMP2 can induce bone formation and regeneration during early embryonic development. It is involved in the hedgehog pathway, TGF beta signaling pathway, and cytokine-cytokine receptor interaction.
