

## Recombinant CD55/DAF Monoclonal Antibody

catalog number: AN300521P

**Note:** *Centrifuge before opening to ensure complete recovery of vial contents.*

### Description

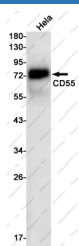

|                     |                                    |
|---------------------|------------------------------------|
| <b>Reactivity</b>   | Human                              |
| <b>Immunogen</b>    | Recombinant Mouse CD55/DAF Protein |
| <b>Host</b>         | Rabbit                             |
| <b>Isotype</b>      | Rabbit IgG                         |
| <b>Clone</b>        | C320209                            |
| <b>Purification</b> | Affinity Purification              |
| <b>Buffer</b>       | 0.2 µm filtered solution in PBS    |

### Applications

### Recommended Dilution

|              |                |
|--------------|----------------|
| <b>WB</b>    | 1:2000-1:20000 |
| <b>IHC-P</b> | 1:200-1:2000   |

### Data

Western blot detection of CD55 in Hela cell lysates using CD55 antibody(1:1000 diluted).

**Observed-MW:78 kDa**

**Calculated-MW:41 kDa**

### Preparation & Storage

**Storage** This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Preservative-Free. Avoid repeated freeze-thaw cycles.

**Shipping** Ice bag

### Background

This gene encodes a glycoprotein involved in the regulation of the complement cascade. Binding of the encoded protein to complement proteins accelerates their decay, thereby disrupting the cascade and preventing damage to host cells. Antigens present on this protein constitute the Cromer blood group system (CROM). Alternative splicing results in multiple transcript variants. The predominant transcript variant encodes a membrane-bound protein, but alternatively spliced transcripts may produce soluble proteins. [provided by RefSeq, Jul 2014]
