

## Phosphate Buffer (PBS, 1 ×), with P/S

Cat. No. : PB180327A

Size : 500mL

### General Information

Product Form	Liquid
Concentration	1×
pH	7.2-7.4
HEPES	Negative
NaCl	8006 mg/L
KCl	201 mg/L
KH <sub>2</sub> PO <sub>4</sub>	272 mg/L
Na <sub>2</sub> HPO <sub>4</sub> -12H <sub>2</sub> O	2865 mg/L
Streptomycin Sulfate	100 mg/L
Penicillin G	100 kU/L
Storage	2-8°C, Shading Light
Shipping	Room Temperature
Expiration date	24 months

### Background

Balanced Salt Solution (Physiological Solution) have the properties of buffer solution (regulate pH), normal saline (maintain osmotic pressure) and culture medium (provide nutrition). It can meet the basic needs of survival and metabolism of tissues, organs or cells in vitro. A small amount of phenolic red was added to some equilibrium salt solutions to indicate the pH change of the solution.

Phosphate Buffered Saline (PBS) is one of the most widely used equilibrium salt solutions in biochemistry. The main components are Na<sub>2</sub>HPO<sub>4</sub>, KH<sub>2</sub>PO<sub>4</sub>, NaCl and KCl. PBS buffers are often used to rinse tissue or cells, to transport cells or tissues, to prepare other reagents, to dilute the cells when counting the cells.

### Notes

1. This product is for research use only.
2. This product is sterilized by 0.1 μm filtration.
3. It is necessary to pay attention to the aseptic operation and avoid the contamination.
