### Elabscience Biotechnology Co., Ltd.

A Reliable Research Partner in Life Science and Medicine

# **SRSF3 Polyclonal Antibody**

catalog number: E-AB-32966

Note: Centrifuge before opening to ensure complete recovery of vial contents.

**Reactivity** Human; Mouse

**Immunogen** Synthesized peptide derived from the C-terminal region of human

**Host** Rabbit **Isotype** IgG

PurificationAffinity purificationConjugationUnconjugated

**Buffer** Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer, 0.5% protein

protectant and 50% glycerol.

Applications	Recommended Dilution	
WB	1:500-1:2000	
IHC	1:100-1:300	
IF	1:200-1:1000	

#### Data

Western Blot analysis of Jurkat cells using SRSF3 Polyclonal

Antibody at dilution of 1:2000.

Observed-MW:25 kDa Calculated-MW:19 kDa

## Preparation & Storage

Storage Storage Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.

**Shipping** The product is shipped with ice pack, upon receipt, store it immediately at the

temperature recommended.

#### Background

The protein encoded by this gene is a member of the serine/arginine (SR)-rich family of pre-mRNA splicing factors, which constitute part of the spliceosome. Each of these factors contains an RNA recognition motif (RRM) for binding RNA and an RS domain for binding other proteins. The RS domain is rich in serine and arginine residues and facilitates interaction between different SR splicing factors. In addition to being critical for mRNA splicing, the SR proteins have also been shown to be involved in mRNA export from the nucleus and in translation. Two transcript variants, one protein-coding and the other non-coding, have been found for this gene.
