

TTC38 Polyclonal Antibody

catalog number: E-AB-52970

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity	Human;Mouse
Immunogen	Fusion protein of human TTC38
Host	Rabbit
Isotype	IgG
Purification	Antigen affinity purification
Buffer	Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.

Applications Recommended Dilution

WB	1:1000-1:5000
IHC	1:50-1:300

Data

Western blot analysis of HepG2 K562 and A172 cell lysates using TTC38 Polyclonal Antibody at dilution of 1:1000

Observed-MW:Refer to figures

Calculated-MW:53 kDa

Immunohistochemistry of paraffin-embedded Human liver cancer tissue using TTC38 Polyclonal Antibody at dilution of

1:85(×200)

Immunohistochemistry of paraffin-embedded Human tonsil tissue using TTC38 Polyclonal Antibody at dilution of

1:85(×200)

Preparation & Storage

Storage	Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.
Shipping	The product is shipped with ice pack,upon receipt,store it immediately at the temperature recommended.

Background

For Research Use Only

TTC38 (tetratricopeptide repeat domain 38) is a 469 amino acid protein that contains three TPR repeats and belongs to the TTC38 family. The gene that encodes TTC38 consists of over 26,000 bases and maps to 22q13. Housing over 500 genes, chromosome 22 is the second smallest chromosome in the human genome. Mutations in several of the genes that map to chromosome 22 are involved in the development of Phelan-McDermid syndrome, Neurofibromatosis type 2, autism and schizophrenia. In addition, translocations between chromosomes 9 and 22 may lead to the formation of the Philadelphia Chromosome and the subsequent production of the novel fusion protein BCR-Abl, a potent cell proliferation activator found in several types of leukemias.
