## Biotin Anti-Human CD235 Antibody[HIR2]

Catalog Number: E-AB-F1080B

Note: Centrifuge before opening to ensure complete recovery of vial contents.

**Description** 

Reactivity Human Host Mouse

**Isotype** Mouse IgG2b, κ

Clone No. HIR2

Isotype Control Biotin Mouse IgG2b, κ Isotype Control[MPC-11] [Product E-AB-F09813B]

Conjugation Biotin

Storage Buffer Phosphate buffered solution, pH 7.2, containing 0.09% sodium azide and 1% BSA.

Applications Recommended usage

FCM Each lot of this antibody is quality control tested by flow cytometric analysis. For flow

cytometric staining, the suggested use of this reagent is  $\leq$  1.0  $\mu$ g per 10<sup>6</sup> cells in 100  $\mu$ L volume or 100  $\mu$ L of whole blood. It is recommended that the reagent be titrated for

optimal performance for each application.

**Preparation & Storage** 

**Storage** Keep as concentrated solution.

This product can be stored at 2-8°C for 12 months. Do not freeze.

Shipping Ice bag

**Antigen Information** 

Alternate Names CD235a/b;GYPA/B;Glycophorin-A/B;MN sialoglycoprotein;PAS-2/3;SS-active

sialoglycoprotein; Sialoglycoprotein alpha/delta

**Uniprot ID** P02724;P06028

**Gene ID** 2993

Background The HIR2 antibody reacts with a common epitope of glycophorin A (CD235a) and

Web: www.elabscience.cn

glycophorin B (CD235b). Glycophorin A is the major sialoglycoprotein expressed on red

blood cell membrane, and erythroid precursors. Glycophorin A shares strong homology with glycophorin B. The HIR2 antibody recognizes human RBCs and erythroid precursors and is useful in erythroid cell development studies. Mature, non-nucleated red blood cells are characteristically glycophorin A positive, but CD45 and

CD71 negative.
