Elabscience®

NKX2-1 Polyclonal Antibody

catalog number: E-AB-12670

Note: Centrifuge before opening to ensure complete recovery of vial contents.

| Description | |
|---|--|
| Reactivity | Human;Mouse;Rat |
| Immunogen | Synthetic peptide of human NKX2-1 |
| Host | Rabbit |
| Isotype | IgG |
| Purification | Affinity purification |
| Conjugation | Unconjugated |
| Buffer | Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol. |
| Applications | Recommended Dilution |
| WB | 1:500-1:2000 |
| Data | |
| KDa 95- | - |
| 72- | |
| 55- | - |
| | • |
| »- | - |
| 28- | |
| Western Blot analysis of Mouse lung tissue using NKX2-1 | |
| Polyclonal Antibody at dilution of 1:700 | |
| Calculated-MV:42 kDa | |
| Preparation & Storage | |

| Storage | Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles. |
|----------|---|
| Shipping | The product is shipped with ice pack, upon receipt, store it immediately at the |
| | temperature recommended. |

Background

This gene encodes a protein initially identified as a thyroid-specific transcription factor. The encoded protein binds to the thyroglobulin promoter and regulates the expression of thyroid-specific genes but has also been shown to regulate the expression of genes involved in morphogenesis. Mutations and deletions in this gene are associated with benign hereditary chorea, choreoathetosis, congenital hypothyroidism, and neonatal respiratory distress, and may be associated with thyroid cancer. Multiple transcript variants encoding different isoforms have been found for this gene. This gene shares the symbol/alias 'TFF1' with another gene, transcription termination factor 1, which plays a role in ribosomal gene transcription.
