Background

Programmed Cell Death 1 Ligand 2 (PDCD1LG2) is a member of the BTN/MOG family. PDCD1LG2 contains one Ig-like C 2-type domain and one Ig-like V-type domain. PDCD1LG2 is highly expressed in the heart; placenta; pancreas; lung and liver; it is weakly expressed in the spleen; lymph nodes; and thymus. PDCD1LG2 is involved in the costimulatory signal; essential for T-cell proliferation and IFNG production in a PDCD1-independent manner. PDCD1LG2 interaction with PDCD1 inhibits T-cell proliferation by blocking cell cycle progression and cytokine production.
