Elabscience®

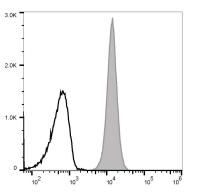

PE Anti-Human CD31 Antibody[158-2B3]

Catalog Number: E-AB-F1050D

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description	
Reactivity	Human
Host	Mouse
Isotype	Mouse lgG1, κ
Clone No.	158-2B3
Isotype Control	PE Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09792D]
Conjugation	PE
Conjugation Information Storage Buffer	PE is designed to be excited by the Blue (488 nm), Green (532 nm) and Yellow-Green (561 nm) lasers and detected using an optical filter centered near 575 nm (e.g., a 585/42 nm bandpass filter). Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.
Applications	Recommended usage
FCM	Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Data

Staining of normal human peripheral blood cells with PE Anti-Human CD31 Antibody[158-2B3] (filled gray histogram) or PE Mouse IgG1, κ Isotype Control (empty black histogram). Cells in the granulocytes gate were used for analysis.

Preparation & Storage	
Storage	Keep as concentrated solution.
	This product can be stored at 2-8°C for 12 months. Please protected from prolonged
	exposure to light and do not freeze.
Shipping	Ice bag
Antigen Information	
Alternate Names	CD31;EndoCAM;GPIIA';PECA1;PECAM-1;PECAM1;Platelet endothelial cell adhesion molecule
For Research Use On	ıly
Toll-free: 1-888-852-8623	

Elabscience®

Uniprot ID	P16284
Gene ID	5175
Background	CD31 is a 130-140 kD type I transmendothelial cell adhesion molecule

CD31 is a 130-140 kD type I transmembrane glycoprotein also known as platelet endothelial cell adhesion molecule-1 (PECAM-1) or Endocam. It is expressed on monocytes, platelets, granulocytes, endothelial cells and lymphocyte subsets. CD31 has been reported to bind CD38 and be involved in wound healing, angiogenesis, and cellular migration in an inflammatory situation.
