Elabscience®

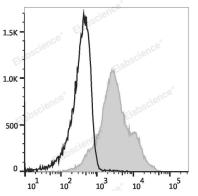

Elab Fluor[®] Red 780 Anti-Human/Mouse CD44 Antibody[IM7]

Catalog Number: E-AB-F1100S

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description			
Reactivity	Human;Mouse		
Host	Rat		
Isotype	Rat lgG2b, κ		
Clone No.	IM7		
Isotype Control	Elab Fluor [®] Red 780 Rat IgG2b, κ Isotype Control[LTF-2] [Product E-AB-F09842S]		
Conjugation	Elab Fluor [®] Red 780		
Conjugation Information	Elab Fluor [®] Red 780 is designed to be excited by the Red (627-640 nm) laser and detected using an optical filter centered near 770 nm (e.g., a 780/60 nm bandpass filter).		
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.		
Applications	Recommended usage		
FCM	Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.		

Data

C57BL/6 murine splenocytes are stained with Elab Fluor[®] Red 780 Anti-Human/Mouse CD44 Antibody (filled gray

histogram) or Elab Fluor[®] Red 780 Rat IgG2b, κ Isotype Control (empty black histogram) are used as control.

Preparation & Storag	Je	
Storage	Keep as concentrated solution.	
	This product can be stored at 2-8°C for 12 months. Please protected from prolonged exposure to light and do not freeze.	
Shipping	Ice bag	
Antigen Information		
Alternate Names	CD44 antigen;CD44;CDw44;Epican;Phagocytic glycoprotein 1;PGP-1;Phagocytic glycoprotein 1;PGP-1;CD44;LHR;MDU2;MDU3;MIC4	
Uniprot ID	P15379;P16070

Gene ID Background

12505;960

CD44 is a 80-95 kD glycoprotein also known as Hermes, Pgp1, H-CAM, or HUTCH. It is expressed on all leukocytes, endothelial cells, hepatocytes, and mesenchymal cells. As B and T cells become activated or progress to the memory stage, CD44 expression increases from low or mid levels to high levels. Thus, CD44 has been reported to be a valuable marker for memory cell subsets. High CD44 expression on Treg cells has been associated with potent suppressive function via high production of IL-10. CD44 is an adhesion molecule involved in leukocyte attachment to and rolling on endothelial cells, homing to peripheral lymphoid organs and to the sites of inflammation, and leukocyte aggregation.
