### PE/Cyanine5 Anti-Mouse CD3ε Antibody[145-2C11]

#### Catalog Number: E-AB-F1103G

Note: Centrifuge before opening to ensure complete recovery of vial contents.

| Description             |  |
|-------------------------|--|
| Reactivity              | Mouse  |
| Host                    | Armenian Hamster   |
| Isotype                 | Armenian Hamster IgG   |
| Clone No.               | 145-2C11   |
| Isotype Control         | [Product E-AB-F09852G]   |
| Conjugation             | PE/Cyanine 5   |
| Conjugation Information | PE/Cyanine5 is designed to be excited by the Blue (488 nm), Green (532 nm) and yellow-green (561 nm) lasers and detected using an optical filter centered near 670 nm (e.g., a 690/50 nm bandpass filter).   |
| Storage Buffer          | Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.  |
| Applications            | Recommended usage  |
| FCM                     | Each lot of this antibody is quality control tested by flow cytometric analysis. The amount<br>of the reagent is suggested to be used 5 µL of antibody per test (million cells in 100<br>µL staining volume or per 100 µL of whole blood). Please check your vial before the<br>experiment. Since applications vary, the appropriate dilutions must be determined for<br>individual use. |

C57BL/6 murine splenocytes are stained with PE/Cyanine5 Anti-Mouse CD3ɛ Antibody[145-2C11] (filled gray histogram) or PE/Cyanine5 Armenian Hamster IgG Isotype Control (empty black histogram).

| Preparation & Storage | e   |
|-----------------------|---|
| Storage               | Keep as concentrated solution.  |
|                       | This product can be stored at 2-8°C for 12 months. Please protected from prolonged exposure to light and do not freeze. |
| Shipping              | Ice bag   |
| Antigen Information   |   |
| Alternate Names       | CD3E;CD3e;T-cell surface antigen T3/Leu-4 epsilon chain;T-cell surface glycoprotein CD3 epsilon chain;T3E               |

CD3 $\epsilon$  is a 20 kD transmembrane protein, also known as CD3 or T3. It is a member of the lg superfamily and primarily expressed on T cells, NK-T cells, and at different levels on thymocytes during T cell differentiation. CD3 $\epsilon$  forms a TCR complex by associating with the CD3 $\delta$ ,  $\gamma$  and  $\zeta$  chains, as well as the TCR  $\alpha/\beta$  or  $\gamma/\delta$  chains. CD3 plays a critical role in TCR signal transduction, T cell activation, and antigen recognition by binding the peptide/MHC antigen complex.
