## FITC Anti-Human CD11a Antibody[R7-1]

Catalog Number: E-AB-F1211C

Note: Centrifuge before opening to ensure complete recovery of vial contents.

| Description             |   |
|-------------------------|---|
| Reactivity              | Human   |
| Host                    | Mouse   |
| lsotype                 | Mouse IgG1, κ   |
| Clone No.               | R7-1  |
| Isotype Control         | FITC Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09792C]  |
| Conjugation             | FITC  |
| Conjugation Information | FITC is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 530 nm (e.g., a 525/40 nm bandpass filter).  |
| Storage Buffer          | Phosphate buffered solution, pH 7.2, containing 0.09% sodium azide and 1% BSA.  |
| Applications            | Recommended usage   |
| FCM                     | Each lot of this antibody is quality control tested by flow cytometric analysis. The amount<br>of the reagent is suggested to be used 5 $\mu$ L of antibody per test (million cells in 100<br>$\mu$ L staining volume or per 100 $\mu$ L of whole blood). Please check your vial before the<br>experiment. Since applications vary, the appropriate dilutions must be determined for<br>individual use. |

Data

Human peripheral blood lymphocytes are stained with FITC Anti-Human CD11a Antibody (filled gray histogram). Unstained lymphocytes (empty black histogram) are used as control.

| Preparation & Storage |  |
|-----------------------|--|
| Storage               | Keep as concentrated solution.   |
|                       | This product can be stored at 2-8°C for 12 months. Please protected from prolonged |
|                       | exposure to light and do not freeze.   |
| Shipping              | Ice bag  |
| Antigen Information   |  |
| Alternate Names       | CD11A;ITGAL;Integrin alpha-L;LFA-1A  |
| Uniprot ID            | P20701   |
| Gene ID               | 3683   |

Background

Elabscience Biotechnology Co., Ltd. A Reliable Research Partner in Life Science and Medicine

CD11a is a 170-180 kD type I transmembrane glycoprotein also known as LFA-1 $\alpha$  chain and integrin  $\alpha$ L subunit. CD11a non-covalently associates with integrin  $\beta$ 2 (CD1 8) to form LFA-1. It is expressed on all leukocytes, including B and T lymphocytes, monocytes, macrophages, neutrophils, basophils and eosinophils. It is absent on non-hematopoietic tissues and platelets. CD11a plays a central role in leukocyte cell-cell interactions and is important in lymphocyte costimulation. CD11a/CD18 binds to ICAM-1 (CD54), ICAM-2 (CD102), and ICAM-3 (CD50).
