Elabscience®

PTPRS Polyclonal Antibody

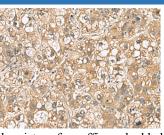

catalog number: E-AB-19112

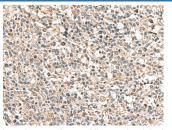

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description	
Reactivity	Human;Mouse;Rat
Immunogen	Fusion protein of human PTPRS
Host	Rabbit
Isotype	IgG
Purification	Antigen affinity purification
Buffer	Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.

ApplicationsRecommended DilutionIHC1:100-1:300

Data

 Immunohistochemistry of paraffin-embedded Human liver
 Immunohistochemistry of paraffin-embedded Human tonsil

 cancer tissue using PTPRS Polyclonal Antibody at dilution of
 tissue using PTPRS Polyclonal Antibody at dilution of

 1:110(×200)
 1:110(×200)

alid for 12 months. Avoid freeze / thaw cycles.
hipped with ice pack,upon receipt,store it immediately at the
ommended.
S

Background

The protein encoded by this gene is a member of the protein tyrosine phosphatase (PTP) family.PTPs are known to be signaling molecules that regulate a variety of cellular processes including cell growth, differentiation, mitotic cycle, and oncogenic transformation.This PTP contains an extracellular region, a single transmembrane segment and two tandem intracytoplasmic catalytic domains, and thus represents a receptor-type PTP.The extracellular region of this protein is composed of multiple Ig-like and fibronectin type III-like domains.Studies of the similar gene in mice suggested that this PTP may be involved in cell-cell interaction, primary axonogenesis, and axon guidance during embryogenesis.This PTP has been also implicated in the molecular control of adult nerve repair.Four alternatively spliced transcript variants, which encode distinct proteins, have been reported.
