# Elab Fluor® Violet 610 Anti-Mouse CD69 Antibody[H1.2F3]

Catalog Number: E-AB-F1187T

Note: Centrifuge before opening to ensure complete recovery of vial contents.

#### **Description**

Reactivity Mouse

Host Armenian Hamster
Isotype Armenian Hamster IgG

Clone No. H1.2F3

Isotype Control Elab Fluor® Violet 610 Armenian Hamster IgG Isotype Control[PIP] [Product E-AB-

F09852T1

**Conjugation** Elab Fluor<sup>®</sup> Violet 610

**Conjugation Information** Elab Fluor<sup>®</sup> Violet 610 is designed to be excited by the violet laser (405 nm) and detected

using an optical filter centered near 613 nm (e.g., a 615/20 nm bandpass filter).

Storage Buffer Phosphate buffered solution, pH 7.2, containing 0.09% sodium azide and 1% BSA.

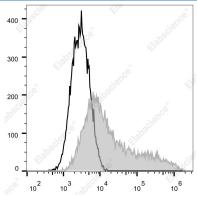

#### Applications Recommended usage

**FCM** Each lot of this antibody is quality control tested by flow cytometric analysis. The amount

of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for

individual use.

#### **Data**

Staining of the 293T cells transfected with pcDNA3.1 plasmid

encoding Mouse CD69 gene with Elab Fluor<sup>®</sup> Violet 610 Anti-Mouse CD69[H1.2F3](filled gray histogram) or Elab Fluor<sup>®</sup> Violet 610 Armenian Hamster IgG Isotype Control(empty black histogram). Total viable cells were used for analysis.

## **Preparation & Storage**

**Storage** Keep as concentrated solution.

This product can be stored at 2-8°C for 12 months. Please protected from prolonged

exposure to light and do not freeze.

CD69 is a 60 kD type II membrane protein composed of a 27/33 kD disulfide-linked homodimer, also known as Very Early Activation Antigen (VEA), AIM, EA1, MLR3, and gp34/28. It is expressed on a subset of thymocytes and platelets. CD69 is rapidly induced on activated T and B cells, neutrophils, and NK cells. It is a C-type lectin, closely related to the NKR-P1 and Ly-49 NK cell activation molecules. CD69 is involved in the early events of cell activation and thymocyte positive selection.
