Elabscience®

Elab Fluor[®] 647 Anti-Mouse CD45.2 Antibody[104.2]

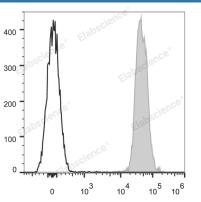

Catalog Number: E-AB-F1122UM

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description		
Reactivity	Mouse	
Host	Mouse	
lsotype	Mouse IgG2a, к	
Clone No.	104.2	
Isotype Control	Elab Fluor [®] 647 Mouse IgG2a, κ Isotype Control[C1.18.4] [Product E-AB-F09803M]	
Conjugation	Elab Fluor [®] 647	
Conjugation Information	Elab Fluor [®] 647 is designed to be excited by the Red laser (627-640 nm) and detected using an optical filter centered near 670 nm (e.g., a $660/20$ nm bandpass filter).	
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.	
Applications	Recommended usage	
FCM	Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results IThe recommended concentration is 0.1-1 ug/10 ⁶ cells	

reagent to obtain optimal results [The recommended concentration is 0.1-1 μ g/10⁶ cells in 100 μ L volume].

Data

C57BL/6 murine splenocytes are stained with Elab Fluor[®] 647 Anti-Mouse CD45.2 Antibody (filled gray histogram). Unstained splenocytes (empty black histogram) are used as control.

Preparation & Storage	
Storage	Keep as concentrated solution.
	This product can be stored at 2-8°C for 12 months. Please protected from prolonged exposure to light and do not freeze.
Shipping	lce bag
Antigen Information	
Alternate Names	LCA;Ly-5.2
Gene ID	19264

For	Research	Use Only

Background

Elabscience Bionovation Inc. A Reliable Research Partner in Life Science and Medicine

CD45.2 is an alloantigen of CD45, expressed by Ly5.2 bearing mouse strains (e.g., A, AKR, BALB/c, CBA/Ca, CBA/J, C3H/He, C57BL, C57BR, C57L, C58, DBA/1, DBA/2, NZB, SWR, 129). CD45, a member of the protein tyrosine phosphatase (PTP) family, is a 180-240 kD glycoprotein expressed on all hematopoietic cells except mature erythrocytes and platelets. There are multiple isoforms in the mouse that play key roles in TCR and BCR signal transduction. These isoforms are very specific to the activation and maturation states of the cell as well as specific cell type. The primary ligands for CD45 are galectin-1, CD2, CD3, CD4, TCR, CD22, and Thy-1.
