

CCND1 Polyclonal Antibody

catalog number: AN006770L

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

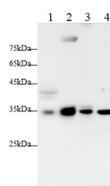

Reactivity	Human;Mouse;Rat
Immunogen	Recombinant Human CCND1 protein expressed by E.coli
Host	Rabbit
Isotype	IgG
Purification	Antigen Affinity Purification
Conjugation	Unconjugated
buffer	PBS with 0.05% proclin 300, 1% protective protein and 50% glycerol,pH7.4

Applications

Recommended Dilution

WB	1:500-1:1000
-----------	--------------

Data

Western blot with Anti CCND1 Polyclonal antibody at dilution of 1:1000. Lane 1: MCF-7 cell lysate, Lane 2: C6 cell lysate, Lane 3: NIH/3T3 cell lysate, Lane 4: SH-SY5Y cell lysate.

Observed-MV:35 kDa

Calculated-MV:34 kDa

Preparation & Storage

Storage	Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.
Shipping	The product is shipped with ice pack, upon receipt, store it immediately at the temperature recommended.

Background

The protein encoded by this gene belongs to the highly conserved cyclin family, whose members are characterized by a dramatic periodicity in protein abundance throughout the cell cycle. Cyclins function as regulators of CDK kinases. Different cyclins exhibit distinct expression and degradation patterns which contribute to the temporal coordination of each mitotic event. This cyclin forms a complex with and functions as a regulatory subunit of CDK4 or CDK6, whose activity is required for cell cycle G1/S transition. This protein has been shown to interact with tumor suppressor protein Rb and the expression of this gene is regulated positively by Rb. Mutations, amplification and overexpression of this gene, which alters cell cycle progression, are observed frequently in a variety of tumors and may contribute to tumorigenesis.
