Elabscience®

FITC Anti-Mouse CD41 Antibody[MWReg30]

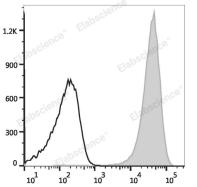

Catalog Number: E-AB-F1183UC

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description	
Reactivity	Mouse
Host	Rat
lsotype	Rat lgG1, ĸ
Clone No.	MWReg30
Isotype Control	FITC Rat IgG1, κ Isotype Control[HRPN] [Product E-AB-F09823C]
Conjugation	FITC
Conjugation Information	FITC is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 530 nm (e.g., a 525/40 nm bandpass filter).
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.
Applications	Recommended usage
FCM	Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is 0.1-1 µg/10 ⁶ cells

reagent to obtain optimal results [The recommended concentration is 0.1-1 μ g/10 in 100 μ L volume].

Data

Mouse platelets are stained with FITC Anti-Mouse CD41 Antibody (filled gray histogram) or FITC Rat IgG1, κ Isotype Control (empty black histogram).

Preparation & Storage	
Storage	Keep as concentrated solution.
	This product can be stored at 2-8°C for 12 months. Please protected from prolonged
	exposure to light and do not freeze.
Shipping	Ice bag
Antigen Information	
Alternate Names	CD41;GPIIb;GPalpha lib;Itga2b
Uniprot ID	Q9QUM0
Gene ID	16399

Background

CD41, also known as integrin α 2b and GPIIb, is a transmembrane glycoprotein that is expressed by platelets and megakaryocytes. It was reported that CD41 is also expressed on hematopoietic progenitors. CD41 associates with CD61 (integrin β 3) to form complexes that interact with fibrinogen, fibronectin, von Willebrand factor, and thrombin. CD41 is required for platelet adhesion and aggregation. Defect of CD41 leads to disorders of coagulation.
