

Histamine H3 Receptor Polyclonal Antibody

Catalog Number: E-AB-13309

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity	Human, Mouse
Immunogen	Synthetic peptide of human HRH3
Host	Rabbit
Isotype	IgG
Purification	Affinity purification
Conjugation	Unconjugated
Formulation	PBS with 0.05% sodium azide and 50% glycerol, PH7.4

Applications Recommended Dilution

WB	1:1000-1:5000
IHC	1:50-1:200

Data

Western Blot analysis of Mouse brain tissue using Histamine H3 Receptor Polyclonal Antibody at dilution of 1:750
Calculated Mw: 49kDa

Immunohistochemistry of paraffin-embedded Human thyroid cancer using Histamine H3 Receptor Polyclonal Antibody at dilution of 1:50

Preparation & Storage

Storage Store at -20°C. Avoid freeze / thaw cycles.

Background

Histamine is a ubiquitous messenger molecule released from mast cells, enterochromaffin-like cells, and neurons. Its various actions are mediated by histamine receptors H1, H2, H3 and H4. This gene encodes one of the histamine receptors (H3) which belongs to the family 1 of G protein-coupled receptors. It is an integral membrane protein and can regulate neurotransmitter release. This receptor can also increase voltage-dependent calcium current in smooth muscle and innervates the blood vessels and the heart in cardiovascular system.
