## Phospho-CAMK2 beta/gamma/delta (Thr287) Monoclonal Antibody

#### catalog number: E-AB-51035

Note: Centrifuge before opening to ensure complete recovery of vial contents.

| Note: Centrituge before   | opening to ensure complete recovery of vial   | <b>Note:</b> Centrifuge before opening to ensure complete recovery of vial contents. |  |  |
|---|---|--|--|--|
| Description   |   |  |  |  |
| Reactivity  | Human;Mouse;Rat   |  |  |  |
| Immunogen   | Synthetic Peptide   |  |  |  |
| Host  | Mouse   | Mouse  |  |  |
| Isotype   | IgG   | IgG  |  |  |
| Clone   | 4H2   |  |  |  |
| Purification  | Protein A purification  |  |  |  |
| Conjugation   | Unconjugated  |  |  |  |
| Buffer  | Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer, 0.5% protein protectant and 50% glycerol. |  |  |  |
| Applications  | Recommended Dilution  |  |  |  |
| IHC   | 1:100-200   |  |  |  |
| Data  |   |  |  |  |
|   |   |  |  |  |
| Immunohistochemistry  | of paraffin-embedded Rat brain tissue Immu  | inohistochemistry of paraffin-embedded Mouse brain                                   |  |  |

#### Background

CAMK2B (Calcium/Calmodulin Dependent Protein Kinase II Beta) is a Protein Coding gene. Diseases associated with CAMK2B include Phencyclidine Abuse. Among its related pathways are ICos-ICosL Pathway in T-Helper Cell and Development Endothelin-1/EDNRA signaling. GO annotations related to this gene include protein homodimerization activity and protein kinase activity. An important paralog of this gene is CAMK2G.

CAMK2G (Calcium/Calmodulin Dependent Protein Kinase II Gamma) is a Protein Coding gene. Diseases associated with CAMK2G include Timothy Syndrome and Exudative Vitreoretinopathy. Among its related pathways are ICos-ICosL Pathway in T-Helper Cell and Development Endothelin-1/EDNRA signaling. GO annotations related to this gene include protein homodimerization activity and protein kinase activity. An important paralog of this gene is CAMK2B. CAMK2D (Calcium/Calmodulin Dependent Protein Kinase II Delta) is a Protein Coding gene. Diseases associated with CAMK2D include Dilated Cardiomyopathy and Cardiomyopathy. Among its related pathways are ICos-ICosL Pathway in T-Helper Cell and Development Endothelin-1/EDNRA signaling. GO annotations related to this gene include protein homodimerization activity and protein kinase activity. An important paralog of this gene include protein homodimerization activity and protein kinase activity. An important paralog of this gene include protein homodimerization activity and protein kinase activity. An important paralog of this gene include protein homodimerization activity and protein kinase activity. An important paralog of this gene is CAMK2B.
