PE/Cyanine5.5 Anti-Human CD69 Antibody[FN50]

Catalog Number: E-AB-F1138I

Note: Centrifuge before opening to ensure complete recovery of vial contents.

| Description | |
|---|--|
| Reactivity | Human |
| Host | Mouse |
| lsotype | Mouse IgG1, κ |
| Clone No. | FN50 |
| Isotype Control | PE/Cyanine5.5 Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09792I] |
| Conjugation | PE/Cyanine 5.5 |
| Conjugation Information Storage Buffer | PE/Cyanine5.5 is designed to be excited by the Blue (488 nm), Green (532 nm) and yellow-green (561 nm) lasers and detected using an optical filter centered near 690 nm (e.g., a 690/50 nm bandpass filter). Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein |
| | protectant. |
| Applications | Recommended usage |
| FCM | Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 µL of antibody per test (million cells in 100 µL staining volume or per 100 µL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. |

PMA and ionomycin-stimulated (4h) Jurkat cells are stained with PE/Cyanine5.5 Anti-Human CD69 Antibody[FN50] (filled gray histogram) or PE/Cyanine5.5 Mouse IgG1, κ Isotype Control (empty black histogram).

| Preparation & Storage | |
|-----------------------|---|
| Storage | Keep as concentrated solution. |
| | This product can be stored at 2-8°C for 12 months. Please protected from prolonged exposure to light and do not freeze. |
| Shipping | lce bag |

| Background |

969

CD69 is a 27-33 kD type II transmembrane protein also known as activation inducer molecule (AIM), very early activation antigen (VEA), and MLR3. It is a member of the C-type lectin family, expressed as a disulfide-linked homodimer. Other members of this receptor family include NKG2, NKR-P1 CD94, and Ly49. CD69 is transiently expressed on activated leukocytes including T cells, thymocytes, B cells, NK cells, neutrophils, and eosinophils. CD69 is constitutively expressed by a subset of medullary mature thymocytes, platelets, mantle B cells, and certain CD4+ T cells in germinal centers of normal lymph nodes. CD69 is involved in early events of lymphocyte, monocyte, and platelet activation, and has a functional role in redirected lysis mediated by activated NK cells.
