## Recombinant Human CXCL1 Protein(GST Tag)

Catalog Number: PDEH100462

Note: Centrifuge before opening to ensure complete recovery of vial contents.

#### Description

Species Human

Source Ecoli-derived Human CXCL1 protein Ala35-Asn107, with an N-terminal GST

 Calculated MW
 43.8 kDa

 Observed MW
 38 kDa

 Accession
 P09341

**Bio-activity** Not validated for activity

#### **Properties**

**Purity** > 85% as determined by reducing SDS-PAGE.

**Endotoxin** < 10 EU/mg of the protein as determined by the LAL method

Storage Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80

°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of

reconstituted samples are stable at < -20°C for 3 months.

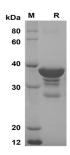

ShippingThis product is provided as lyophilized powder which is shipped with ice packs.FormulationLyophilized from a 0.2 μm filtered solution in PBS with 5% Trehalose and 5%

Mannitol.

**Reconstitution** It is recommended that sterile water be added to the vial to prepare a stock solution of

0.5 mg/mL. Concentration is measured by UV-Vis.

#### Data

SDS-PAGE analysis of Human CXCL1 proteins, 2µg/lane of Recombinant Human CXCL1 proteins was resolved with SDS-PAGE under reducing conditions, showing bands at 38 kDa

#### Background

# Elabscience®

A Reliable Research Partner in Life Science and Medicine

Chemokine (C-X-C motif) Ligand 1 Protein (CXCL1) is a growth factor for melanoma cells and a chemotaxin for neutrophils and a member of the CXC chemokine family that is a potent neutrophil attractant and activator and is also active toward basophils. CXCL1 is expressed by macrophages, neutrophils and epithelial cells; it has neutrophil chemoattractant activity. CXCL1 plays a critical nonredundant role in the development of experimental Lyme arthritis and carditis via CXCR2-mediated recruitment of neutrophils into the site of infection and may also have important pronociceptive effects via its direct actions on sensory neurons, and may induce long-term changes that involve protein synthesis.
