

# Recombinant Mouse Caspase-8/CASP8 protein (His tag)

Catalog Number: PDEM100044

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## Description

Synonyms	CASP8_MOUSE;Caspase-8;Casp8;EC:3.4.22.61
Species	Mouse
Expression Host	E.coli
Sequence	Ser 219-Gly 376
Accession	O89110
Calculated Molecular Weight	17.3 kDa
Observed molecular weight	20 kDa
Tag	N-His

## Properties

Purity	> 95 % as determined by reducing SDS-PAGE.
Endotoxin	Please contact us for more information.
Storage	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.
Shipping	This product is provided as lyophilized powder which is shipped with ice packs.
Formulation	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization. Please refer to the specific buffer information in the printed manual.
Reconstitution	Please refer to the printed manual for detailed information.

## Data

> 95 % as determined by reducing SDS-PAGE.

## Background

Caspase-8 (Cysteine-aspartic acid protease 8/Casp8a; also named MCH5, FLICA and MACH alpha 1) is a 28 kDa member of the peptidase C14A family of enzymes. It is widely expressed and is considered an initiating caspase for the apoptotic cascade. Caspase-8 acts on a wide variety of substrates, including pro-caspases 3, 4, 6, 7, 9 and 10, c-FLIPL and pro-caspase-8 itself. Human pro-caspase-8a is a 54.56 kDa, 479 amino acid (aa) protein. It contains two N-terminal death domains (aa 1-177), followed by a catalytic site that utilizes His317Gly318 plus Cys360. Normally, it is an inactive, cytosolic monomer. But following death-domain (DD) containing receptor oligomerization, Caspase-8 is recruited to the death-inducing signaling complex (DISC) that forms around the death domains of the oligomerized receptor.
