Purified Anti-Human ADAM10 Antibody[11G2]

catalog number: AN003550P

Note: *Centrifuge before opening to ensure complete recovery of vial contents.*
Description

Reactivity	Human
Immunogen	Recombinant Human ADAM10 protein
Host	Mouse
Isotype	Mouse IgG1, κ
Clone	11G2
Purification	>98%, Protein A/G purified
Conjugation	Unconjugated
buffer	PBS, pH 7.2. Contains 0.05% proclin 300.

Applications

Applications	Recommended Dilution
FCM	2 µg/mL(1×10^5-5×10^5 cells)

Data

Human peripheral blood lymphocytes were stained with 0.2
µg Purified Anti-Human ADAM10 Antibody[11G2] (Right)
and 0.2 µg Mouse IgG1, κ Isotype Control (Left), followed
by FITC-conjugated Goat Anti-Mouse IgG Secondary
Antibody.

Preparation & Storage

Storage	Store at 4°C valid for 12 months or -20°C valid for long term storage, avoid freeze / thaw cycles.
Shipping	Ice bag

Background

ADAM10 (also known as Kuzbanian, mammalian disintegrin metalloprotease, myelin-associated metalloproteinase) is a member of the ADAM family that contains a disintegrin and metalloprotease-like domain . Like other membrane-anchored ADAMs, ADAM10 consists of the following domains, pro with a cysteine switch and furin cleavage sequence, catalytic with the zinc-binding site and Met-turn expected for reprolysins, disintegrin-like, cysteine-rich, EGF-like, transmembrane, and cytoplasmic. ADAM10 is highly conserved, with 97% amino acid identity between mouse, rat, bovine and human and 45% identity between mouse and Drosophila. The active enzyme processes notch, notch ligand delta, and amyloid protein precursor at the alpha site, playing an important role in neurogenesis . It also processes the 26 kDa membrane-anchored pro-tumor necrosis factor-alpha (TNF-alpha) to the 17 kDa mature TNF-alpha. It cleaves myelin basic protein and type IV collagen. ADAM10 is widely expressed in tissues and resides both on the cell surface and in the cell.
