A Reliable Research Partner in Life Science and Medicine

# **Recombinant Human FGF-17 Protein**

Catalog Number: PKSH032434

Note: Centrifuge before opening to ensure complete recovery of vial contents.

$\mathbf{r}$					٠.			
H))	es	C	r٦	n	tı	n	m	

Species Human

**Source** E.coli-derived Human FGF-17 protein Thr 23-Thr 216, with an N-terminal His

 Calculated MW
 23.3 kDa

 Observed MW
 24 kDa

 Accession
 O60258

**Bio-activity** Measure by its ability to induce 3T3 cells proliferation. The ED<sub>50</sub> for this effect is <5

ng/mL. The specific activity of recombinant human FGF-17 is  $> 2 \times 10^5$  IU/mg.

#### **Properties**

**Purity** > 98 % as determined by reducing SDS-PAGE.

Endotoxin < 0.1 EU per µg of the protein as determined by the LAL method.

**Storage** Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80

°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of

reconstituted samples are stable at < -20°C for 3 months.

**Shipping** This product is provided as lyophilized powder which is shipped with ice packs.

**Formulation** Lyophilized from sterile PBS,pH 8.0.

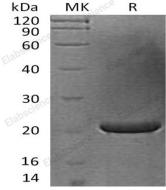

Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as protectants

before lyophilization.

Please refer to the specific buffer information in the printed manual.

**Reconstitution** Please refer to the printed manual for detailed information.

# Data

> 98 % as determined by reducing SDS-PAGE.

### Background

Fibroblast Growth Factor 17 (FGF17) is a member of the heparin-binding growth factors family that is prominently expressed in the cerebellum and cortex. Proteins of this family possess broad mitogenic and cell survival activities and they are involved in a variety of biological processes including embryonic development cell growth; morphogenesis; tissue repair; tumor growth; and invasion. FGF17 plays an important role in the regulation of embryonic development and it acts as signaling molecule in the induction and patterning of the embryonic brain. In addition; FGF17 stimulates the proliferation and activation of cells that express FGF receptors.
