

MEM Complete Medium (20)

Cat. No.: PM150411C

Size: $125mL \times 4$

General Information

Product Form Liquid

Ready-to-use Concentration

Component MEM(PM150411); Nutrients; 2 mM L-Alanyl-L-Glutamine (PB180419)

Pricella by Elabscience

Bacterial detection Negative

Fungal detection Negative

Mycoplasma detection Negative

Endotoxin content < 3 EU/mL

2-8°C, Shading light Storage

Ice bag **Shipping**

Expiration date 3 months

Introduction

MEM medium (Minimum Essential Medium) was developed on the basis of Eagle basic medium. It is one of the most basic and widely used culture medium, and one of the most commonly used culture medium in animal cell culture. MEM medium contains 12 kinds of essential amino acids, glutamine and 8 vitamins, which is simple, mainly used in the culture of adherent cells.

MEM, with NEAA medium is added L-alanine, L-glutamic acid, L-asparagine, L-aspartic acid, L-proline, Lserine and glycine on the basis of MEM medium. These 7 kinds of NEAA, can reduce the side effects of producing non-essential amino acids during cell culture and promote cell proliferation and metabolism. by Elabscience

Notes

- 1. This product is for research use only.
- 2. This product is sterilized by 0.1 µm filtration.
- It is necessary to pay attention to the aseptic operation and avoid the contamination during the culture. 3.
- 4. It is not suitable for long time storage at room temperature.
- This product is a ready-to-use medium. If there is no special need, don't add serum, penicillin and streptomycin. It can be used directly.
