## Elab Fluor® Red 780 Anti-Mouse CD80 Antibody[16-10A1]

Catalog Number: E-AB-F0992S

Note: Centrifuge before opening to ensure complete recovery of vial contents.

## **Description**

Reactivity Mouse

Host Armenian Hamster Isotype Armenian Hamster IgG

Clone No. 16-10A1

Isotype Control Elab Fluor® Red 780 Armenian Hamster IgG Isotype Control[PIP] [Product E-AB-

F09852S1

Conjugation Elab Fluor® Red 780

**Conjugation Information** Elab Fluor® Red 780 is designed to be excited by the Red (627-640 nm) laser and

detected using an optical filter centered near 770 nm (e.g., a 780/60 nm bandpass filter).

Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein Storage Buffer

protectant.

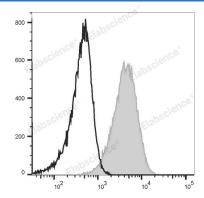

### **Applications**

### Recommended usage

**FCM** 

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 µL of antibody per test (million cells in 100 μL staining volume or per 100 μL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

#### **Data**

RAW264.7 cells are stained with Elab Fluor® Red 780 Anti-Mouse CD80 Antibody (filled gray histogram) or Elab Fluor® Red 780 Armenian Hamster IgG Isotype Control (empty black histogram).

## **Preparation & Storage**

Storage Keep as concentrated solution.

This product can be stored at 2-8°C for 12 months. Please protected from prolonged

exposure to light and do not freeze.

Shipping Ice bag

## **Antigen Information**

**Alternate Names** Activation B7-1 antigen; B7; Cd80; T-lymphocyte activation antigen CD80

Q00609 **Uniprot ID**

CD80 is a 60 kD highly glycosylated protein. It is a member of the lg superfamily and is also known as B7-1, B7, and Ly-53. CD80 is constitutively expressed on dendritic cells and monocytes/macrophages, and inducibly expressed on activated B and T cells. The ligation of CD28 on T cells with CD80 and CD86 (B7-2) on antigen presenting cells ( such as dendritic cells, macrophages, and B cells) elicits co-stimulation of T cells resulting in enhanced cell activation, proliferation, and cytokine production. CD80 appears to be expressed later in the immune response than CD86. CD80 can also bind to CD152, also known as CTLA-4, to deliver an inhibitory signal to T cells.
