

Recombinant Mouse bFGF/FGF2 Protein (His Tag)

Catalog Number: PKSM040952

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

| | |
|----------------------|---|
| Species | Mouse |
| Source | E.coli-derived Mouse bFGF;FGF2 protein Ala11-Ser154, with an N-terminal His |
| Calculated MW | 17.2 kDa |
| Observed MW | 19 kDa |
| Accession | P15655 |
| Bio-activity | Measure by its ability to induce 3T3 cells proliferation. The ED ₅₀ for this effect is <1.5 ng/mL. The specific activity of recombinant mouse FGF-2 is approximately >1 x 10 ⁶ IU/mg. |

Properties

| | |
|-----------------------|---|
| Purity | > 98 % as determined by reducing SDS-PAGE. |
| Endotoxin | < 0.1 EU per µg of the protein as determined by the LAL method. |
| Storage | Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80 °C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months. |
| Shipping | This product is provided as lyophilized powder which is shipped with ice packs. |
| Formulation | Lyophilized from sterile PBS with 0.01% sarkosyl,pH 8.0. Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as protectants before lyophilization. Please refer to the specific buffer information in the printed manual. |
| Reconstitution | Please refer to the printed manual for detailed information. |

Data

> 98 % as determined by reducing SDS-PAGE.

Background

Basic fibroblast growth factor (bFGF), also known as FGF2, is a member of the fibroblast growth factor (FGF) family. It is a highly specific chemotactic and mitogenic factor for many cell types, appears to be involved in remodeling damaged tissue, such as ulcer healing, vascular repair, traumatic brain injury (TBI). bFGF is a critical component of human embryonic stem cell culture medium. In addition, bFGF protein is a heparin-binding cationic protein involved in a variety of pathological conditions including angiogenesis and solid tumour growth. Thus, bFGF is regarded as a target for cancers chemopreventive and therapeutic strategies. bFGF/FGF2 Protein & Antibody Products
