Elab Fluor[®] 700 Anti-Human CD244 Antibody[C1.7]

Catalog Number: E-AB-F1374M1

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description	
Reactivity	Human
Host	Mouse
lsotype	Mouse lgG1, κ
Clone No.	C1.7
Isotype Control	Elab Fluor [®] 700 Mouse IgG1, к Isotype Control[MOPC-21] [Product E-AB-F09792M1]
Conjugation	Elab Fluor [®] 700
Conjugation Information	Elab Fluor [®] 700 is designed to be excited by the Red laser (627-640 nm) and detected using an optical filter centered near 719 nm (e.g., a 725/40 nm bandpass filter).
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% sodium azide and 1% BSA.
Applications	Recommended usage
FCM	Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Data

Staining of normal human peripheral blood cells with FITC

Anti-Human CD8a Antibody [OKT-8] and Elab Fluor[®] 700 Anti-Human CD244 Antibody[C1.7](left) or Elab Fluor[®] 700 Mouse IgG1, κ Isotype Control(right). Cells in the lymphocytes gate were used for analysis.

Preparation & Storag	je
Storage	Keep as concentrated solution.
	This product can be stored at 2-8°C for 12 months. Please protected from prolonged
	exposure to light and do not freeze.
Shipping	Ice bag
Antigen Information	
Alternate Names	2B4;SLAMF4
Uniprot ID	Q9BZW8
Gene ID	51744
Gene ib	31744

For Research Use Only

Elabscience®

Background

CD244, known as 2B4, is a 38 kD type I transmembrane protein. It is a member of the CD2 subset of the immunoglobulin superfamily (IgSF) molecules. CD244 is expressed

Elabscience Biotechnology Co., Ltd.

on NK cells, a subset of T cells (including most CD8+ T cells and γ/δ T cells), monocytes, basophils, and eosinophils. CD48 is the ligand of CD244. It has been reported that ligation of human CD244 results in enhanced NK cell cytotoxicity and cytokine production. Recent studies have shown that human CD244, like murine CD244, has both activating and inhibitory functions, which are dependent on the density of surface 2B4 expression, degree of ligation, and the level of the adaptor molecule SAP expression.
