Poloxamer 188 Solution

Cat. No.: PB180528

Size: 100 mL

Product Description

Poloxamer 188 is a non-ionic surfactant used to control shear forces in suspension cultures. It can also be utilized to reduce foam formation in stirred cultures and decrease cell adhesion to glass surfaces. Poloxamer 188 is supplied at a 10% concentration, with an effective working concentration of 0.1%.

Application

The product is suitable for scientific research and large-scale production of cell-culture-based biological products. It is not intended for direct human use or as a medicine.

General Information

Product Form	Liquid
Working Concentration (Recommended)	1:100
pH	5.0-7.5
Osmolality	60-120 mOsm/kg
Storage	Store at 2-30°C in a dry place
Shipping	Room Temperature
Expiration date	18 months

Notes

1. This product is only used for scientific research or further research, not for diagnosis and treatment.
2. This product has been sterilized through filtration and is ready for direct use.
3. When using this product, aseptic techniques should be observed to prevent contamination.
